

Andrew Bowerbank

Industrial Design, 1989

National Vice President, Sustainability & Energy, WSP Canada

Andrew Bowerbank is the National Vice President, Sustainability & Energy, WSP Canada, and a well-known figure in the Canadian energy and building infrastructure sectors. He has established a reputation as a leading authority on emerging clean technologies, high-performance building design, and low-carbon economics. Bowerbank is the former CEO and Executive Director of the World Green Building Council, where he successfully worked with Council members to grow WorldGBC membership from eight founding nations to more than 60 member countries. He is also the former Global Director of Sustainable Building Services at EllisDon Corporation, where he spearheaded the award-winning Carbon Impact Initiative.
