

## **Theo Willert**

**Electromechanical Engineering Technology, 2015**

**Corporate Automation Engineer, Magna International**

Theo Willert is a Corporate Automation Engineer for Magna International. Trained in Electromechanical Engineering Technology, Willert helped to develop automated test equipment for automotive seats while still a student at Humber College. Willert's skills in mechatronics have earned him gold medals at trade and technology skills competitions at the Ontario and Canada levels. He also earned Canada's first bronze medal in mechatronics and the Best in Nation Award at the WorldSkills competition. Today, Willert is a mentor for up-and-coming talent in the skilled trades and is known as an elite manufacturing technologist on the international stage.
