Regulatory Affairs

Ontario Graduate Certificate

Program Code: 07721

Campus: North

Length: 3 semesters starting in September

Regulatory affairs (RA) professionals are an integral part of protecting the public health. RA professionals are involved in controlling the safety and efficacy of food and health-related products by shepherding these products from conception to federal approval and public availability. Graduates of our program find work as RA specialists in a variety of fields such as:

- agrichemicals
- biotechnology
- hospitals
- medical device development
- inspection
- natural health product industries
- pharmaceuticals
- research and development

You will gain knowledge of the regulatory system, legislation, procedures and practices related to the development, manufacture, quality assurance and marketing of health-related products. Expert instruction and real-world experience gained through a work placement will give you the skills and knowledge you need to enter this highly competitive field.

Work Placement

Following two academic course-based semesters, students complete a three-month (450 hours) internship work placement that provides opportunities to apply and integrate theoretical knowledge and skills into real-world work settings. Internship placements are conducted in a wide range of organizations such as pharmaceutical, natural health products (NHP), medical device and biotechnology companies, as well as contract research organizations, hospitals, government agencies/departments and scientific institutions.

To progress into Semester 3, students must have successfully completed the first two semesters. During Semesters 3, students complete their learning on placement sites, and assessments are carried out by assigned supervisors at the site of placement. Humber assists students in finding their placements by working with our industry partners to identify openings. Students are responsible for finding their own work placement that is aligned with learning outcomes of our program.

Courses
Admission Requirements

Applicants must meet all the requirements below in order to meet minimum program eligibility. Meeting minimum eligibility requirements does not guarantee an offer of admission. Admission decisions will be available via MyHumber, or by email and mail. Admission decisions will not be released by phone.

Admission selection is based on the following 5 requirements:

1. ACADEMIC
   To be eligible for admission, you must possess the following:
   - A Bachelor of Science degree, majoring in health science, pharmacy, some area in life sciences or a related field.

2. ENGLISH LANGUAGE PROFICIENCY
   All applicants whose first language is not English must meet Humber’s English Language Proficiency Policy.

3. INTERNATIONAL CREDIT EVALUATION
   Canadian citizens or permanent residents with international education are required to provide a WES or ICAS evaluation.

4. RESUME
   Applicants must submit a detailed resume including education, work, and/or volunteer experience. Excellent resumes contain experiences that are relevant to the subject of interest. The resume itself should be well organized and easy to follow. Standard Canadian spelling and grammar should be used.

Important: For information on Fall 2020 course delivery modes, please visit the Fall 2020 Course Delivery Modes page.
Applicants must submit a 3-5 minute video introduction outlining their interest in this field of study. The video should express why the applicant has an interest in Regulatory Affairs specifically in Humber College's Regulatory Affairs graduate certificate program.

**Expectations for Video Introduction**

The video should include the use of clear and concise language that uses appropriate pace, tone, and projection of voice. Hand gestures should be kept to a minimum and when they are used, should add to the presentation style rather than distract. The video must be within the time allowed.

The video should contain a clear and compelling rationale for the applicant's interest in the subject. A specific rationale for wanting to study at Humber College should be included and will demonstrate an understanding of the demands of the graduate certificate.
