

# HAWKIE TALKIE

## WELCOME FROM HUMBER

Here is Humber's first Hawkie Talkie newsletter!

You will find admission and program updates, financial aid info and topics that are intended to inform, debunk, celebrate and help. We hope HT can be used as a tool in your work with students. We also encourage you to share it with your colleagues.

Join us at our Guidance Lunch on May 4, profiling the Faculty of Social & Community Services, admissions and financial aid. We look forward to continuing the important conversations that shape the work we do and hope to see you there!

Over and out.

## HUMBER GRAD WINS EMMY FOR WORK ON STRANGER THINGS

Katie Halliday, Film and Television Production graduate, won a second Primetime Emmy Award for her work as sound effects editor.

## U is for College

We hear it all the time: "I'm taking U-level courses. I'm not even thinking about college." Fast forward a year or two; college has become a place to 'start over' because something in university just didn't click.

In Fall 2022, 870 incoming students with some post-secondary were aged 21 or younger.<sup>1</sup> Not all, but many, feel defeated - like they just couldn't cut it, like maybe they aren't as smart as they once thought. With the right program, many of these students flourish and become great students (and great graduates, too!).

Gone are the days when "smart" kids go to university - the world is different, and so too, should be the approach to choosing post-secondary. C-level students are bound for college and U-level students can be, too. It's important for students to know that exploring all post-secondary options, considering the credential mix and the career they want should drive their decision. Humber's recruitment team can help support you in spreading this message through presentations, on-campus visits and parents' nights, to name a few.

### The wine, not the label...

... As David Rose from *Schitt's Creek* brilliantly put it. It's less about college or university and more about the future students envision. It's about finding what they're good at. In a world with limitless options, finding what you're good at is a pretty great place to start. Visit [humber.ca/degrees](http://humber.ca/degrees).
