

## What If

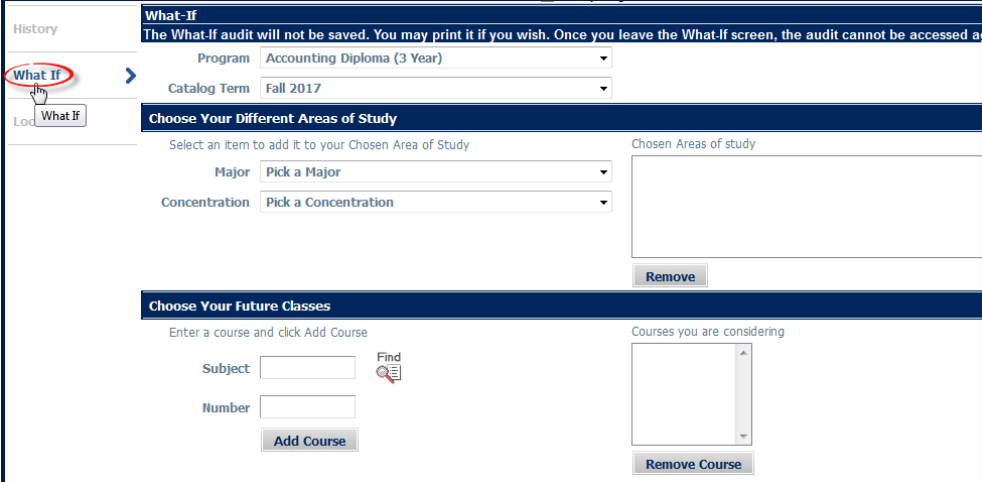

### Login

1. Login to **MyHumber**.  
For helping logging in, see the [How to Navigate MyHumber Quick Reference Guide](#).
2. Click **Student**.
3. Click **Academic Progress**.

### What If

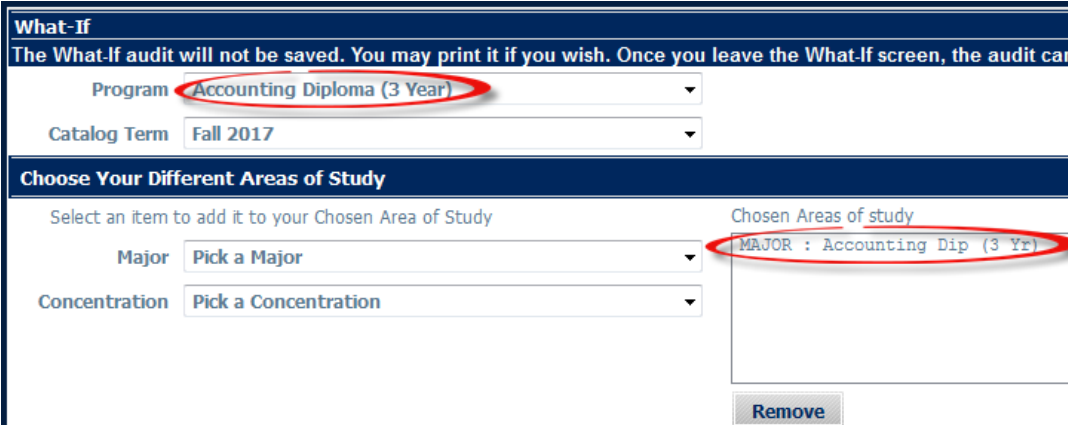

**What-if** option allows users to process speculative program audits using the student's current class history.

1. Click the **What If** option.
2. A student may be audited against the requirements for a different program/major, or a different catalog term. To generate a What-If program audit, **select a program** and a **catalog term** you wish to run the **What-If** audit.

The screenshot shows the 'What-If' audit interface. At the top, there is a warning: 'The What-If audit will not be saved. You may print it if you wish. Once you leave the What-If screen, the audit cannot be accessed again.' Below this, there are dropdown menus for 'Program' (Accounting Diploma (3 Year)) and 'Catalog Term' (Fall 2017). The 'What If' button is circled in red. The interface is divided into two main sections: 'Choose Your Different Areas of Study' and 'Choose Your Future Classes'. The 'Choose Your Different Areas of Study' section has dropdowns for 'Major' (Pick a Major) and 'Concentration' (Pick a Concentration), and a 'Chosen Areas of study' list. The 'Choose Your Future Classes' section has input fields for 'Subject' and 'Number', and a 'Courses you are considering' list.

3. Select a major which is the same as the selected program from the Major window. Once you have selected the major, the major will be displayed in the Chosen Areas of study window.

This close-up screenshot shows the 'What-If' audit interface. The 'Program' dropdown is set to 'Accounting Diploma (3 Year)' and the 'Catalog Term' is 'Fall 2017'. The 'Major' dropdown is set to 'Pick a Major'. The 'Chosen Areas of study' list shows 'MAJOR : Accounting Dip (3 Yr)' circled in red. The 'Concentration' dropdown is set to 'Pick a Concentration'.

4. Future classes may be specified to see how they would apply to your What-If audit.
5. Once you have specified your criteria, click on the Process What-If button to generate a What-If audit.
6. It is important to remember that What-If audits cannot be saved. Once they are run, the results can be printed, but the audit cannot be accessed again after leaving the What-If screen. However, it is possible to run another What-If audit with the same parameters.
