

CONFERENCE 2018

How to Baffle and Then Appreciate a Psychiatrist:

Deeper Perspectives on Dual Diagnosis

REGISTER
NOW!

Save the date:

June 1, 2018 | Centre for Entrepreneurship - Lakeshore Campus at Humber College

Session Description:

Individuals with intellectual disabilities are sometimes prone to complex psychiatric and behavioural challenges that require a multi-disciplinary approach. In this highly interactive workshop, Dr. Chan explores a complimentary relationship between psychiatry and applied behaviour analysis (ABA) through several case vignettes. Emphasis will be placed on assessing and conceptualizing clinical presentations while exploring and problem-solving these cases using biopsychosocial and behavioural strategy models. This is a highly informative and interactive talk with focus on current evidence-based, best practice perspectives for individuals with dual diagnosis.

Presenter: Doctor John C.C. Chan

Dr. John Chan is a consulting child and adolescent psychiatrist with the Centre for Behaviour Health Services, Mackenzie Health. He specializes in the assessment and treatment of individuals with dual diagnoses. Dr. Chan received his Doctor of Medicine from McMaster University in 1999 and completed a fellowship in Developmental Disabilities/Child and Adolescent Psychiatry in 2005 in the United Kingdom. He has received many awards from his professorship at Queen's University including the Child Psychiatry Award, Resident Research Prize and Excellence in Teaching Award. He has also presented nationally and internationally on varied topics related to developmental disabilities and psychiatry and published journal articles in the Canadian Journal of Psychiatry.
