

Developing the World's Youth

Innovation in Entrepreneurship and Employment

North Space and L Space

February 6th – 27th, 2017

Weekdays 10 am – 5 pm

This exhibit invites you to see the developing world through the eyes of today's youth. The images and voices weave together stories about the challenges and opportunities in earning an income in an economy that does not offer a direct path to employment. You will learn about the power of creative thinking, the upside of taking risks and how passion can fuel sustainable change.

Humber's Sulawesi Economic Development Strategy (SEDS) is advancing entrepreneurship in universities in Indonesia by equipping the next generation with the skills and confidence to break out of traditional career paths. Save the Children's Youth in Action Program (YiA) supports out-of-school rural African youth to develop their foundational and entrepreneurial skills and explore livelihood opportunities.
