

AGING IN COMMUNITY EDUCATION & RESEARCH HUB (ACER)

The Aging in Community Education and Research Hub (ACER) conducts innovative research that creates, implements and evaluates solutions that strengthen community-based supports to empower older adults to remain engaged in and connected to their communities.

ACER's Core Values

- 1** Research conducted by ACER is connected to and enhances academic programs at Humber and partnerships with our Centres of Innovation (Col network).
- 2** ACER research supports opportunities that create a culture of innovation and learning for Humber students, staff and faculty.
- 3** Older adults ('end users') are involved in guiding research that is important to them and, to the extent possible, participate in research projects as Research Assistants.
- 4** Research conducted by ACER is cross disciplinary resulting in as many perspectives as possible contributing to the research.
- 5** ACER works collaboratively to build partnerships and to create solutions with business, industry, government, community organizations and other post-secondary institutions.
- 6** All research conducted by ACER takes equity, diversity and inclusion into account.

Accelerating solutions for tomorrow
