

## CCBI & Humber Galleries Fellowship Program

Students currently enrolled in any program at Humber College are eligible to apply for The Centre for Creative Business Innovation (CCBI) and Humber Galleries Fellowship Program.

Fellows will experience working as part of an interdisciplinary team with support from a project lead and creative producer to conceive of and execute a complex creative project that can take many different forms. This work integrated learning experience bridges the gap between academic and professional life and expands avenues into the broader creative ecology.

Over the course of 14 weeks, fellows will learn industry-specific skills and best practices for digital innovation and workflow. They will also be expected to demonstrate adaptability, deal with ambiguity, and build a functional community of collaboration and creation.

As the CCBI is developing a framework for applied research-creation in collaboration with our partners, fellows will be trained to view themselves as researchers, and to understand how the creative process is a form of research.

## About Graphic Medicine

Snakebite has been recognised by the World Health Organization as a neglected tropical disease affecting millions in tropical and subtropical countries. In association with the Asclepius Snakebite Foundation, students from Humber College's Faculty of Media and Creative Arts work with Biology students at Whitman College (Walla Walla, WA) to create materials to raise awareness about this public health crisis. Humber students have come from a variety of programs, including Advertising & Media Communications, Digital Communications, Graphic Design, Multimedia Design & Development, Music and Photography.

In 2022, participants in the Graphic Medicine Fellowship:

- Created visual materials to assist clinicians diagnose and treat snakebite cases in rural areas of Guinea and Congo;
- Developed a system to facilitate the identification of venomous snakes so that victims receive appropriate anti-venom treatment;
- Created several social media campaigns highlighting the public health crisis, the ecological importance of snakes, and what a viewer can do;
- Developed and prototyped a travel notebook that can be used for fundraising in North America.

## Qualifications:

- Be a current Humber College student.
- Be in good academic standing.
- Require field placement hours (Work-Integrated Learning) to graduate.
- Preference will be given to students in the third or final year of a Degree OR second or final year of an Advanced Diploma OR final year of a Diploma OR completing a Graduate Certificate.

## Skills:

- Accessibility
- Advertising
- Communications
- Community Health
- Filmmaking
- Global Health
- Graphic Design
- Music Composition
- Visual Arts
