SoTL: DATA VISUALIZATION TECHNIQUES

This session will provide an introductory overview on how to represent textual data in a visual context to help others better understand its significance or value. Participants will learn tips and tricks on data visualization using Microsoft Excel. Topics to be discussed include arranging data for optimal chart creation, when to use each chart type, examples of good and bad data visualizations, and an introduction to intermediate and advanced chart templates (ex. Histogram, Stacked Bar, Combo, and Sunburst).
