

Humber College Public Relations Proudly Presents

## REPURPOSE FOR PURPOSE

— Backgrounder —

Humber College Public Relations Certificate Students to host  
#Repurposeforpurpose a virtual sustainability event

Humber College is committed to sustainable operations across spanning all areas of the college and in the community. Although the COVID-19 pandemic has forced much of Humber's activities off campus, it is important to stay connected environmental and social justice issues. A resource set up to support students in their green endeavours is Humber's Office of Sustainability.

The Office of Sustainability aims to foster and support a culture of sustainability in the Humber community and across all campuses. This is achieved by raising awareness about environmental and social justice issues and ensuring sustainability is a learning outcome for all students who come through Humber. By reducing the campus carbon foot print, a safe and healthy campus environment can be created by encouraging a sustainable lifestyle.

As most of Humber's classes and activities have gone online, the Office of Sustainability and SSE wanted to still be able to engage with students and the Humber community on the ways to continue to support green. Repurpose for Purpose will enroll attendees in Humber's sustainable development goals and teach them ways to practice sustainability on and off campus. The event will highlight sustainability resources Humber has to offer, ways to become environmental stewards and will showcase sustainable practices and easy ways to repurpose in your daily life.

The virtual event goes live on November 29, 2021 on Microsoft Teams. Students and attendees can join the 'Repurpose for Purpose' event page on Facebook to stay up to date on the latest event details and for a preview on what's to come the day of the event.
