

# WE ARE

# STAYING HEALTHY THIS FLU SEASON

**We are currently** in the middle of the flu season. Humber encourages our staff, students and visitors to continue to practice flu prevention techniques.

**Influenza**, the “flu”, is a contagious respiratory infection typically caused by influenza A and B viruses. Common symptoms include fever, chills, sore throat, cough, muscle aches and extreme fatigue.

## Help Prevent the Spread of the Flu:

1. Obtain the flu vaccine.
2. Wash your hands often with soap and water / Use hand sanitizers.
3. Cough or sneeze in a tissue or your sleeve.
4. Avoid touching your eyes, nose or mouth.
5. Regularly clean surfaces and shared items.
6. Stay at home when you are sick.

## What the College is doing over the Flu Season:

- Flu vaccines are available to staff and students at North and Lakeshore Health Centres.
- Hand sanitizing dispensers (e.g. by elevators) available in common public areas.
- Additional cleaning and disinfecting measures in common public areas, including in Residences, Athletics, Food Services, Computer Labs and Washrooms.
- Regular communication with Toronto Public Health regarding flu prevention and treatment recommendations.
