HUMBER

TEACHING IN A DIGITAL WORLD CERTIFICATE

Fall 2021

Online

The **Teaching in a Digital World Certificate (TDWC)** program is designed to meet the needs of a diverse group of learners with varying degrees of teaching experience in the online and/or hybrid environment. While teaching in an online environment shares many characteristics with face-to-face teaching, it is a fundamentally different educational experience for instructors and students. The certificate is designed to develop essential online teaching competencies and engage participants as a learner, facilitator, and beginner developer.

Courses are delivered online over a period of eleven weeks each semester.

Upon successful completion of the three courses, participants receive a Certificate of Completion.

Note: Courses must be taken in the following order: DEV 014, DEV 117, DEV 118

DEV 014 909 Clinic for Learning Management Systems
September 19 to October 9

DEV 117 909 Teaching in a Digital World—Part 1
October 17 to November 13

DEV 118 909 Teaching in a Digital World—Part 2
November 21 to December 18

For more information, contact **Falisha Rowe** at Falisha.Rowe@humber.ca

Registration is restricted to current Humber faculty only.

TEACHING IN A DIGITAL WORLD CERTIFICATE

DEV 014 Clinic for Learning Management Systems

This clinic is designed for the beginner, intermediate, and experienced Learning Management System users. Participants will focus on developing the skills required to use a Learning Management System (LMS) to effectively deliver face-to-face, hybrid and online courses. The clinic provides faculty members with the opportunity to become familiar with the student experience from pre-to post registration. In doing so, participants are introduced to effective communication techniques and strategies for using the tools of the learning management system to create a supportive and engaging learning environment. Participants are expected to apply the material in this clinic to their own face-to-face and online/hybrid course sites.

DEV 117 Teaching in a Digital World—Part 1

This course is designed to meet the needs of a diverse group of learners with varying degrees of teaching experience in the online and/or hybrid environment. While teaching in an online environment shares many characteristics with face-to-face teaching, it is a fundamentally different educational experience for instructors and students. Whether you are a novice or an experienced learner, you will assess your personal readiness for the online world, what motivates students to learn online, and how to plan and map your course for the online teaching environment. Further, you will explore current best practices and technological tools that can easily be incorporated into your current practice. Participants must take DEV.014 as a pre requisite or apply to PLAR the outcomes.

DEV 118 Teaching in the Digital World—Part 2

This course is designed as the final piece of the Teaching in the Digital World Certification. Like the previous courses it is designed to meet the needs of a diverse group of learners with varying degrees of teaching experience in the online and/or hybrid environment. This course will take a hands on approach and have students move from the planning stages of online course development to the execution of an online teaching module. Further, you will apply pedagogical strategies and technical strategies with a focus on creating a social network and engagement among members in your learning community. This course will take an in-depth look into the resources available for you to create an engaging online module. Participants must take DEV.014 and DEV.117 as a pre requisite or apply to PLAR the outcomes.
