

Academic & Digital Campus Plans
Indigenous Education & Engagement – Student Consultation
February 15, 2022: 1:00 - 2:00pm

This session was held for students associated with Humber's Indigenous Education and Engagement.

Question 1: What could Humber do to better prepare you for your future career?

- Increase online classes and on campus opportunities to interface and network with program alumni, professors, and Humber's industry and community partners to assist students in better understanding the careers available in their sector and the skills they require
- Encourage social entrepreneurship among students and young people, including engaging them in projects that enact social change
- Better support low-income students (e.g., scholarships, paid internships, research opportunities)
- Enhance education around soft skill development to assist students in meeting job requirements

Question 2: How can Humber use technology and digital resources to improve your learning experiences?

- Enhance the use of technology in the classroom to make it more engaging and interactive (e.g., use more videos, virtual reality)
- Provide in-class, online and hybrid options supported by the appropriate technology to meet diverse learner needs

Question 3: What one big thing could Humber do to set it apart from all other colleges and polytechnic institutions in the province?

- Encourage entrepreneurship. Consider creating a version of Shark Tank: set up a mechanism that allows students to present their ideas to alumni or industry and community organizations for feedback and potential support to implementing their ideas
- Offer sports analytics program/sports performance analysis as this offering does not exist elsewhere in Canada
- Increase access to work integrated learning so that students are linked to industry and community organizations prior to their graduation
