Subject: M&V Plan Third-Party Verification

Dear Sir,

Pursuant to the verification of the M&V plan developed to measure Humber College's progress toward achieving the framing goals established in its Integrated Energy Master Plan (IEMP), Econoler is pleased to inform you that the M&V plan¹ adheres to the 2016 International Performance Measurement and Verification Protocol (IPMVP®) Core Concepts (EVO 10000 – 1:2016).

The IPMVP is a widely accepted industry protocol for determining the impacts of energy projects. An M&V plan that complies with this protocol ensures the reliability and transparency of the measured performance of your project.

Sincerely,

Lorenz Mootosamy, M.Sc., CMVP
Energy Efficiency Technical Expert

¹ Revision 1.0 dated July 30, 2021.
